1. Introduction

Below you can find an overview of the possibilities to update, post or retrieve **remark fields** to and from the webshop.
 Some of these fields must be saved by means of a backend, other fields can be changed by use of the API and or webshop.

1.1 Checkout overview

When using the webshop you are presented with a few options during the checkout process.

You can either pick up a delivery at the wholesaler or let the wholesaler drop off the delivery at one of the client locations.

This document will use reference letters (**A-D**) (demonstrated below) to point out where exactly this information is used.

A Algemene opmerking voor deze bestelling:	A Algemene opmerking voor deze bestelling:

API – ClientOrders (GET)

Oresto.API.Models.GET.ClientOrders.ClientOrders

Client orders information

Name	Description
Client	Information about the client
DeliveryAddress	Information about the delivery address of the order
OrderDate	The order date (TimeZone BE)
OrderDateUtc	The order date in UTC (TimeZone UTC/GMT)
OrderNumber	The order number
ProcessedDate	The date the order has been processed (TimeZone BE)
ProcessedDateUtc	The date the order has been processed (TimeZone UTC/GMT)
Products	A list of products
Remark	Additional remarks about the order

3. Wholesaler pickup remarks

A user can either chose to pick up the delivery at the wholesaler or let the wholesaler deliver the order to the client (*ref B1 and B2*). In this scenario the user has chosen to pick up at the wholesaler.

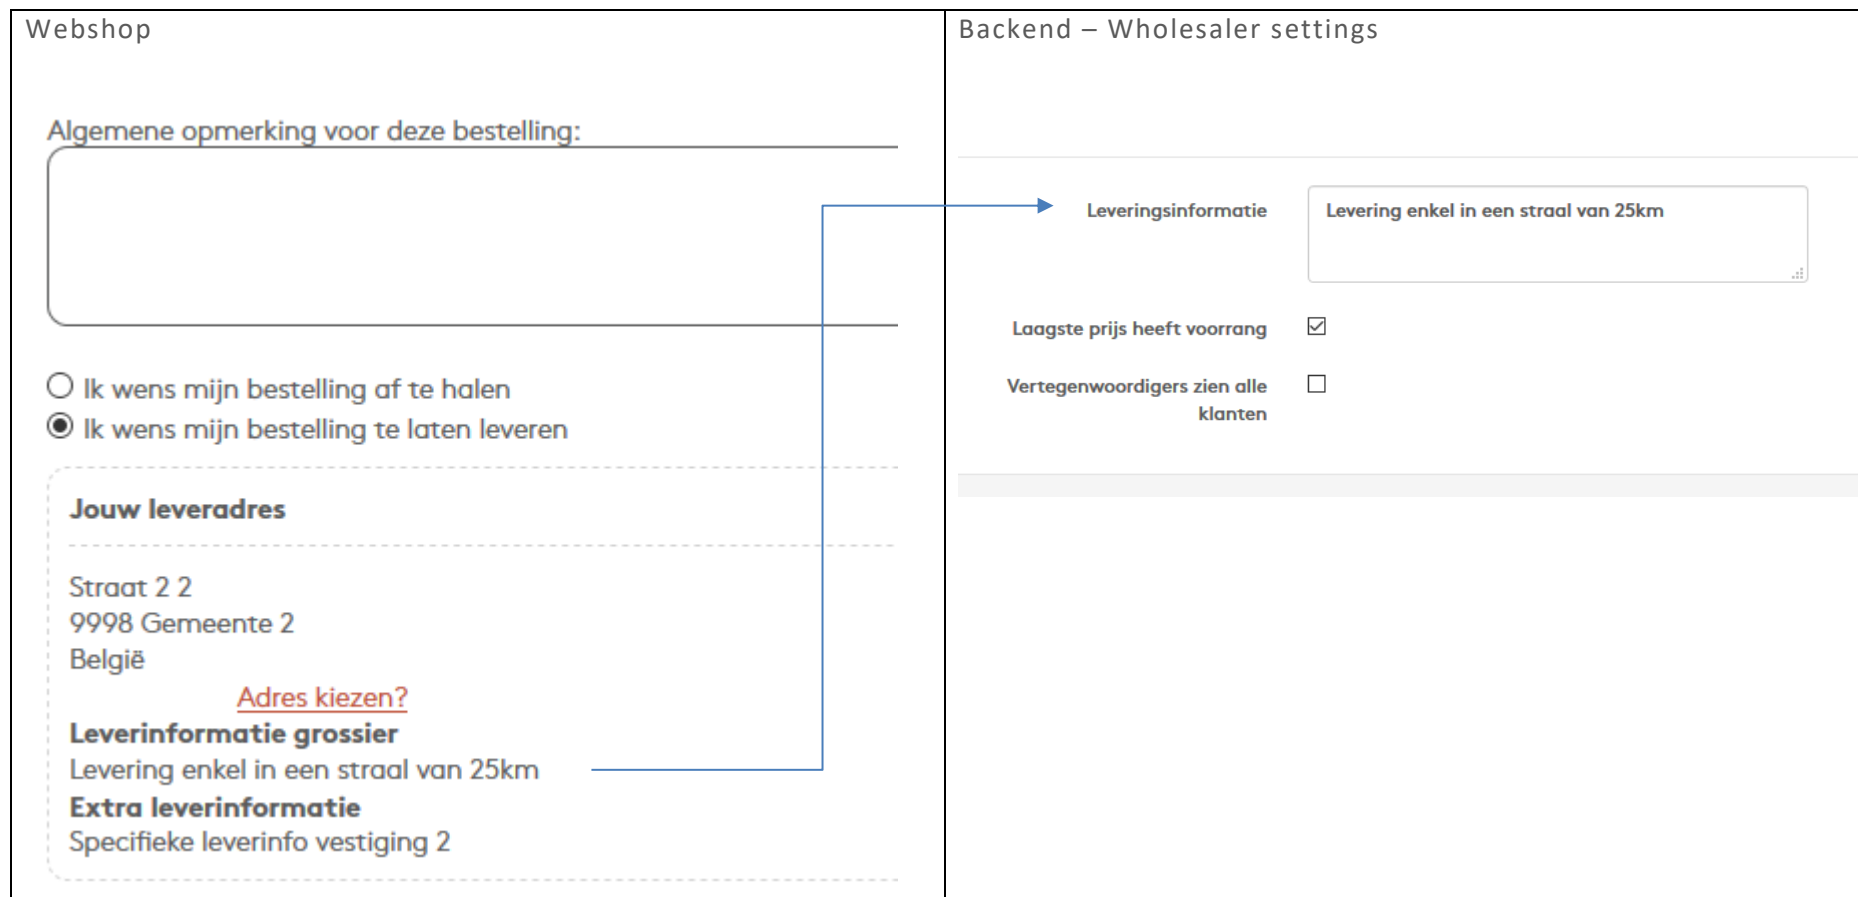

The wholesaler can define different pickup instructions ("Afhaalinformatie grossier" – "Ramasser des informations de grossiste") for each location (*ref C1*). These instructions can be changed using the backend. The wholesaler has a custom screen "Mijn instellingen" – "Mes paramètres" -> "Mijn afhaaladressen" – "Mes adresses de prise en charge" to edit each instruction.

4. Wholesaler delivery remarks

A user can either chose to pick up the delivery at the wholesaler or let the wholesaler deliver the order to the client (**ref B1 and B2**). In this scenario the user has chosen to let the wholesaler deliver to the client.

The wholesaler can define delivery instructions ("Leverinformatie grossier" – "Livraison grossiste d'information") shared for all deliveries (**ref C2**). These instructions can be changed using the backend. The wholesaler has a custom screen "Mijn instellingen" – "Mes paramètres" to edit the delivery instructions.

5. Client address delivery remarks

5.1 Webshop/backend

A user can either chose to pick up the delivery at the wholesaler or let the wholesaler deliver the order to the client (*ref B1 and B2*). In this scenario the user has chosen to let the wholesaler deliver to the client.

The wholesaler can define different delivery instructions ("Extra leverinformatie" – "Informations de livraison supplémentaires") for each client location (*ref D*). These instructions can be changed using the backend. The wholesaler has a custom screen "Klanten" – "Cliënte" -> "Klant vestigingen" – "Branches des clients" to edit each instruction.

5.2 Webshop/API

A user can either chose to pick up the delivery at the wholesaler or let the wholesaler deliver the order to the client (*ref B1 and B2*). In this scenario the user has chosen to let the wholesaler deliver to the client.

The wholesaler can define different delivery instructions ("Extra leverinformatie" – "Informations de livraison supplémentaires") for each client location (*ref D*). These instructions can be changed using the API. The wholesaler can use the endpoints (POST/PUT/GET) of Client locations to either update or retrieve the information.
